Resistance**

National Public Seating strong and sturdy science tables are a necessity for your science lab. Built from solid ash wood with an attractive polyurethane clear finish, our **High Pressure Laminate Science Lab Tables** are perfect for many science and chemistry classrooms. HPL tabletops provide an exceptional work surface and are made with a high-pressure laminate surface that has been tested according to NEMA standard testing to resist scratches, boiling water, high temperatures, and many forms of stains including a number of acids.

HPL tabletops come equipped with our top of the line ribbed-tongue T-molding. The table legs are assembled with a 13-gauge, heavy-duty steel brace attached with a metal-on-metal double bolt connection for superior durability and to provide a no-wobble experience. NPS® Science Tables offer a choice of book compartments or solid front aprons, with an industry top-of-the-line ash wood frame and legs outfitted with rubber liquid-protecting leg boots and adjustable glides for accurate floor leveling.
