

BUILT TO LAST

ANODIZED ALUMINUM HEATED TRANSPORT CABINET

Maintain safe food temperatures and ensure quality meals every time.

- Side-to-side airflow pattern provides even heating for safe food temperatures and greater heat retention during repeated door openings
- Extremely durable, anodized aluminum exterior and interior door panels have an easy to clean surface
- Locking hasp-style latch secures contents during transport
- Control console is top mounted under a lockable cover for maximum security
- Thermostat (factory preset to 165°F) and thermometer accurately control and measure interior temperatures
- Full-length door handle for efficient operation
- Conveniently holds twelve 18"x26" sheet pans or steam table pans on durable, stainless steel ledges
- Full perimeter bumper protects walls and equipment
- Heavy-duty 6" PrisonBilt™ casters are secure with tamper-resistant screws
- Additional models and tray capacities available, contact factory.

Control console is top mounted under a lockable cover for maximum security

STRONG ENOUGH FOR EVEN THE TOUGHEST ENVIRONMENTS
