- ◆ FDA CFR-21 and/or NSF compliant materials provides peace of mind that this product is suitable for potable applications.

CUNO's line of 8000 Series cartridges provide the continuing benefits of CUNO filtration in a user-friendly design. A choice of medias such as graded density carbon and granular activated carbon with micron ratings from 0.5 to 5, as well as optional integrated scale inhibition provide solutions for varying water conditions. The 8000 Series cartridges do not require activation for functionality, allowing an operator to change the cartridge in seconds.
