Features & Benefits

Strong Technology
Posts and Traverses are built using advanced manufacturing technology and the use of a non-corrosive composite material. The robust design along with unique composite material gives Elements an unprecedented longevity, durability and weight-bearing capacity in the industry. Shelves up 48" (1220 mm) long hold up to 800 lbs. (363 kg) evenly distributed static weight. Shelves 54" – 78" (1380 – 1980 mm) long hold up to 600 lbs. (272 kg) each. Shelves connected by Corner Connectors hold up to 400 lbs. (182 kg) on a 36" (910 mm) to 48" (1220 mm) traverse.

Hygienic Design
Camshelving Shelf Plates contain Camguard® antimicrobial, a silver-ion technology that inhibits the growth of mold, fungus and bacteria that may cause odors, stains and product degradation. Camguard is incorporated throughout the shelf plate material so that it will never wash off or wear out. The shelf plates remove easily and can be placed in an open end Camrack® (OETR314) for washing.

Shelving for Life
Non-corrosive design will endure all areas of operation – dry-storage, coolers, warewashing, freezer and heavy condensation and humidity settings – without risk of rusting, peeling, denting, cracking or warping. Functions in temperatures down to -36°F (-30°C) or warm environments up to 190°F (88°C).

Fits in Any Space
Innovative design helps maximize valuable space and provides strength and stability. Straight line components are attached by sharing posts of existing units with no loss of weight-bearing capacity. Corner Connectors bring units together in 90° angle to create corner & U-shaped units. Reduces costs by sharing posts of existing unit without the use of add-on clips or "S" hooks.

Requires minimal assembly
Can be put together with the use of a rubber mallet. Two-piece dovetails secure Traverses so they can be set easily into place.
