High Heat Measuring Cups and Cover

Cambro's new High Heat Measuring Cup is the first of its kind in foodservice. Made from heat-tolerant, food-grade material, these High Heat Measuring Cups will not crack or shatter during regular use. The optional cover is self-venting and designed to prevent splatters and spills that can occur during heating, leaving the inside of the microwave or oven clean. Use the High Heat Measuring Cup to heat liquids or sauces in the microwave, collect hot water from a dispenser, fill steam tables or chafing dishes, or rehydrate food products.

- Withstands temperatures ranging from -40° to 375°F (-40° to 190°C).
- Molded-in standard and metric graduations ensure accuracy and will hold up to the rigors of foodservice.
- Molded handle is positioned for both comfort and safety.
- Optional cover fits both 2 qt. (1,9 L) and 4 qt. (3,8 L) measuring cups.
- BPA free.

Features both Metric and American Standard graduation marks.

CODE	DESCRIPTION	DIMENSIONS W x H
200MCH	2 qt. (1,9 L) Measuring Cup	6 ³ / ₈ " x 7 ⁷ / ₈ " (16,2 x 19,4 cm)
