

table linens

Setting an elegant table begins with quality table linens. Snap Drape offers the finest line of tablecloths and napkins available to the hospitality industry ranging from 100% spun polyester, beautiful damask patterns to durable Visa® Plus. All fabrics are available in an array of sizes and a wide variety of colors (see page 24).

The latest technology available to the hospitality industry in table linens is Spun polyester — it has the look and feel of cotton without sacrificing the durability, colorfastness and shrink resistance of filament polyester. If you are looking for a maximum return on your linen investment, think spun polyester from Snap Drape.

Snap Drape's line of 100% spun polyester linens are made up of the plain weave, **Nouveau UltraSpun™** and the exclusive damask pattern, **Nouveau Windsor™**. Both are woven with Murata Air Jet Spun Polyester in the warp and the fill. Softer, stronger, brighter, whiter are just a few advantages of our Nouveau line of table linens.

Snap Drape also offers Milliken's line of genuine table linen fabrics including Signature and several Damask HD™ (High Definition) fabrics: **Wave™**, **Rose** and **Satin Band**. All are constructed from a spun polyester/filament polyester blend with Milliken's Soft Touch Technology™. This gives the fabric strength and better colorfastness with a soft, natural feel that lasts wash after wash.

For linens with excellent soil and stain release properties, **Visa® Plus** is the perfect choice. Visa Plus has the outstanding durability, performance and return on investment that made Visa® Oxford the fastest-selling table linen on the market. Now thanks to a recently patented soil release breakthrough, you can wash at a low 120 degrees rather than 160 degrees, dramatically lowering your energy costs.
