Low Profile Portable Oil Filter

Models

PF95LP

Standard Features

- Large capacity: filters up to 80 lbs. (40 liters) of oil
- Low profile -- fits under most fryers
- Powerful 4 GPM pump
- 1/3 HP motor
- 5' (1524 mm) return hose, including nozzle screen and quick disconnect
- Durable stainless steel pan and pump housing
- Heavy-duty welded construction on casters
- Lid with opening for return hose
- Filter starter kit

Specifications

Designed to make routine filtration easy and efficient

The PF95LP is a large capacity, heavy-duty portable oil filter designed to extend the useful life of oil by filtering out sediment, carbon deposits, fatty acids and other elements that degrade the oil.

The powerful 4 GPM pump automatically cycles the oil through filter paper and filter powder, trapping the particles and debris and returning the clean, refreshed oil into the fryer.

Regular and proper use of the portable filter can measurably extend oil life and consistently yield high quality, great tasting fried foods.

The low profile filter fits beneath most fryers for labor-saving, gravity draining.

The quick-disconnect feature on the hose allows for compact storage and easy cleaning.

The PF95LP filter carries a one-year parts and labor warranty.
