Bearings	Sealed	
Adjustable Thickness	Yes	230v/50hz 4.4amps
Legs	4"	Shipping Weight 235 lbs. / 106 kgs.
Finish	Stainless	

Operating the DPR3000 2-pass roller is simple. Follow these easy steps.

Once you have pre-portioned & floured your doughballs, place a small amount of flour in the hopper and on the receiving table. Next place your doughball in the hopper.

Pass 1. Your doughball will be partially flattened and semi oblong. Rolling out on the floured receiving table.

Pass 2. Is just like the first pass but now you are going to turn your dough 90 degrees left or right inserting it into the bottom rollers.

After your dough is rolled out it is good to place your hands beneath the bottom chute and lightly stretch your dough to its desired sizing placing it directly on your pan, screen or peel.
