≡ FEATURES & BENEFITS ≡

- **Hydrocarbon refrigerants (R-290)**
 With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).
- **Digital temperature control & monitor system**

 - Keep food products safe by maintaining constant temperatures.
 - Digital display allows for easy monitoring.
 - Programs interpret the condition of refrigeration systems by self-diagnosis.
 - Automatic defrost system will defrost as needed.
 - Automatic evaporator fan motor delays.
- **No electrical cabinet heater is needed**
 Turbo Air is the first in the industry to replace a frame heater with a method of using compressor-produced heat. This eliminates any unnecessary energy consumption while providing efficient freezing performance.
- **High-density polyurethane insulation**
 The entire cabinet structure is foamed-in-place using high density, HCFC free polyurethane insulation.
- **Triple pane heated glass doors**
 Equipped with unique triple-pane heated glass doors which enhance energy efficiency by preventing heat transfers and minimizing condensation. Lightweight door construction reduces door maintenance, bushing wear, and facilitates smooth door opening.
- **LED interior lighting**
- **Freezer holds -10°F ~ 5°F for the best in frozen food preservation**
