HEAT PAD WITH POWER PACK

ITEMS

Item	Description
VP1212	Heat Pad for use with Power Pack
VDBPB	Power Pack
VDBPACC	120V AC Power Pack Charger
VDBPCC	12V Power Pack Charger for In-car Use

DESCRIPTION

The Heat Pad with Power Pack enables operators to optimize bag temperature, food quality, and delivery range.

It is ideal for pizza and food delivery service applications that desire a continuous and portable heating system, as well as food deliveries with multiple stops that require opening the delivery bag multiple times or longer travel time.

Designed to work with Vollrath delivery bags, the heat pad slips into a pocket inside the Vollrath delivery bag and the cords exit through a grommet in the bag. The power pack conveniently stows into a pouch on the side of the bag. To preheat the bag, simply connect the heat pad to the charged power pack. Use the included 12V in-car charge to recharge the lithium ion battery power pack in between deliveries.

FEATURES

- Includes power pack, 120V wall power pack charger (VDBPACC) and 12V power pack charger (VDBPCC) for in-car use
- Reliable, high power density lithium-ion power pack has five temperature settings in °F and °C

Note: Heat pad is only for use with the power pack. See Vollrath.com for the heat pad that is powered by the 120V power cord.

WARRANTY

Heat pad, power pack and power pack chargers have a 90-day warranty against manufacturer defects. See Vollrath.com for full warranty details.

SPECIFICATIONS

Item No.	Description	Dimensions IN (CM)		Voltage	Amps	Hz	Plug/Receptacle	Receptacle
		Overall	Cord Length
