Specifications

The eikon® e1s is the first choice for anyone who wants to prepare fresh, hot food on demand where space is at a premium.

The eikon® e1s is the ideal way to cook, toast, grill, bake and regenerate a wide range of fresh or frozen foods, such as sandwiches, pastries, pizzas, fish, vegetables and meat.

One standard eikon® e1s unit runs off a standard 208V 15A supply.

HOW IT WORKS

The convection fan pulls air in through the fan inlet (1). This is then heated and returned to the cavity through the catalytic converters (2) and impinger plate (3) to produce an even heat pattern in the oven. This heat pattern allows food to cook evenly and produces a crisp golden finish, everytime.
