JET AIR PIZZA OVEN

Doyon PIZ series is designed like no other on the market. Our exclusive Jet Air baking technology is a reversing fan system that helps to bake evenly. It has 3 individual drop down doors that only takes up to 6" (152 mm) in front of the oven.

PIZ ovens are great for space and energy savings. The 3 perforated nickel plated decks are designed for fast heat accumulation as well as even heat distribution across the decks. The heat provided from the nickel coated perforated deck makes a nice even crust due to the air moving through the perforated holes and from the heat of the metal deck itself.

Better known for baking pizzas, it can also be used to bake and cook multiple products.
