## Underbar Refrigeration: Solid Slide Lid Deep Well Horizontal Bottle Cooler

### STANDARD FEATURES

#### DESIGN

- True's refrigerated horizontal bottle coolers are designed with enduring quality and value. Our commitment to using the highest quality materials and oversized refrigeration assures colder product temperatures and years of trouble free service.

#### REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly (CFC free) 134A refrigerant.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser; maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C).
- Sealed, cast iron, self-lubricating evaporator fan motor(s) and larger fan blades give True bottle coolers a more efficient low velocity, high volume airflow design. This unique design ensures colder standard temperatures and faster recovery in high use situations.
- Condensing unit accessed from behind front grill, slides out for easy maintenance.

- Forced-air cooling. Positively guided air flow cools bottles on top first. Evaporator coil virtually runs length of cooler for balanced temperatures throughout the cabinet.
