Glass Door Ice Merchandiser: Swing Door No Tank Freezer with LED Lighting

STANDARD FEATURES

DESIGN

- True's commitment to using the highest quality materials and over sized refrigeration systems provides the user with colder product temperatures, and lower utility costs in an attractive ice merchandiser

REFRIGERATION SYSTEM

- Factory engineered, self-contained capillary tube system using environmentally friendly (CFC free) 134A refrigerant.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser; maintains 20°F to 25°F (-6.6°C to -3.8°C) cabinet temperature.
- Sealed, cast iron, self-lubricating evaporator fan motor and larger fan blades give True merchandisers a more efficient low velocity, high volume airflow design. This unique design ensures colder standard temperatures and faster recovery in high use situations.
- Bottom mounted condensing unit positioned for easy maintenance; "No stoop" design maximizes visibility by raising merchandised product to higher level.
- Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

CABINET CONSTRUCTION

- Exterior - non-peel or chip white laminated vinyl; durable and permanent.
- Interior - attractive, NSF approved, white aluminum interior liner with stainless steel floor.
- Insulation - entire cabinet structure is foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.
- Frame rail fitted with leg levelers.
- Illuminated exterior sign panel.

DOOR

- Heated, triple pane thermal insulated glass door assembly with extruded aluminum frames. Minimizes condensation build up on glass for more effective merchandising.
- Door fitted with a 12" (305 mm) long extruded handle.
