CABINET CONSTRUCTION

The cabinet front and doors are constructed of heavy gauge, polished stainless steel to maintain an attractive appearance after years of heavy use. Polyurethane foam insulation throughout ensures the ultimate in energy efficiency.

DOOR CONSTRUCTION

The doors are heavy gauge, polished stainless steel with a stainless steel interior liner. Each door is provided with a cylinder lock and ergonomically correct vertical handle. The door hinges are self-closing and have a hold-open feature at 120° which facilitates product loading. Proximity switches energize the recessed interior incandescent lighting when the door is opened.

HEATING SYSTEM

The safety shielded, "strip type" heaters located at the bottom of the cabinet interior are precisely controlled by the V-TEMP™ electronic control with a temperature range from 80°F to 180°F. An externally mounted blower system ensures even temperatures throughout the cabinet interior. A built-in, adjustable humidity control vent allows the operator to maintain a moist or more dry environment.

INTERIOR STORAGE ARRANGEMENTS

Each cabinet section is provided with three (3) heavy-duty, chrome plated wire shelves. The shelves are adjustable in one inch increments. A wide door opening allows for the use of a variety of optional pan slide configurations including 18" x 26" and 12" x 20" pans.

ELECTRONIC CONTROL SYSTEM

The easy to use V-TEMP™ Control is provided standard with a two year parts and labor warranty. This durable, water resistant microprocessor monitors and controls the entire temperature maintenance process. It includes an ON/OFF switch located on the control face, interior light switch, LED temperature indicator in °C or° F, a HI/LO audio/visual temperature alarm , and a door ajar alarm. The control has a set point memory. Upon start up, the unit will warm up to the last temperature set point. A manager's "lock-out" feature is provided to safeguard pre-determined control settings.
