VBCF CABINET CONSTRUCTION

AISI 30418/10 stainless steel exterior and interior. Die-formed interior floor has rounded corners and central drain for easy cleaning. High density foamed in place CFC and HCFC free expanded polyurethane insulation (3.2" thick). Anti-condensation perimeter heating around door opening. Nontoxic epoxy coated evaporator coil. Internal bumpers and external guards protect the cabinet interior and the control panel from mobile carts.

VBCF DOOR CONSTRUCTION

Ergonomic door handle, safety panic button and outside lock, and rubber sweeper gasket.

VBCF REFRIGERATION SYSTEM

The self-contained refrigeration system uses R404A refrigerant. Evaporator is fitted with high velocity fans for maximum cooling efficiency. Indirect air flow assures highest product quality.

VBCF INTERIOR STORAGE ARRANGEMENTS

Accepts mobile carts— 26"W x 32"D x 74"H. For pan capacity, see model characteristics chart.

VBCF ELECTRONIC CONTROL SYSTEM

Electronic control with LCD/color display insures precise control of Blast Chilling (194° F to 37° F in 90 Minutes) or Shock Freezing (194° F to 0° F in 240 Minutes) Cycles. One touch hard and soft automatic blast chilling or shock freezing cycles based either on core probe temperature or timed cycle. Automatic recognition of the core probe and automatic conservation mode at the end of a cycle. One touch display of HACCP Alarms (power failure, cycle time out of HACCP required time, high temp, low temp) recorded in memory. The real time clock provides date, time, and duration of HACCP alarms (power failure, cycle time out of HACCP required time, high temp, low temp) recorded in memory. Will record up to 10 alarm events before over writing the first alarm and will keep the data for a minimum of 48 hours in case of a power failure. On board program memory holds 99 total programs. Adjustable Evaporator Fan Speed button allows for regulation of the fan during the blast chilling or shock freezing cycle. Compressor protected by overload cut-out with automatic reset. Micro-switch control cuts out the evaporator fan and compressor whenever the door is opened.
